

Carbotech Innovative Announces Participation at Tecna 2024

Teramo — 18/09/2024 — Carbotech Innovative is pleased to announce its participation in Tecna 2024, the leading international trade fair dedicated to innovative technologies and solutions for coverings, surface processing, and design, taking place at the **Rimini Expo Center from September 24 to 27, 2024.**

During the event, Carbotech Innovative will showcase its latest innovation: the Carbon Tile, designed to seamlessly integrate with lighting in luxury environments. This solution uses carbon fiber to provide a modern and functional design, merging aesthetics with maximum efficiency.

One of the main advantages of the Carbon Tile is its lightweight nature. Weighing between 2kg and 6kg per square meter, depending on requirements, it is ideal for luxury applications where a combination of lightness and durability is important.

“Tecna is a critical platform to demonstrate how our carbon fiber solutions can transform spaces, enhancing both aesthetics and functionality,” said Marco Pistillo, CEO of Carbotech Innovative. **“The Carbon Tile** is just one example of the numerous possibilities offered by advanced composite materials for luxury interior design.”

Carbotech Innovative will be located in **Hall D3 - Stand 350**. Visitors can discover how carbon fiber composite materials can improve energy efficiency and durability without compromising on design, thanks to the combination of cutting-edge technologies and advanced functionality.
